

Have you been waiting for

Widerbar

Oriental Copper's ever increasing product range includes our widest copper busbar **305 mm as standard** (we can produce wider sizes on special request)

- As with all our product range, **305 mm** is available OC-ETP® and Oxygen free material, both can reach Electrical conductivity of **101% IACS**.
- OC-ETP® material has excellent mechanical properties which allow for bending and machining.
- We also offer a 'one stop fabrication service so that finished parts give you great engineered solutions.

Please visit our website www.orientalcopper.com for more information on **wide bar** and our extensive range of products.

We will be very pleased to discuss your requirements further:

Please contact our Sales Representative

Or,

E- mail us on sale@orientalcopper.com

We look forward to offering you our service in the very near future

Oriental Copper is a world - class engineering design and manufacturer of high conductivity Copper Busbar and copper fabricated products used in the electrical, electronic and non-electrical industries around the world.

OC-ETP® HIGH CONDUCTIVITY BUSBAR - USE LESS ENERGY - BE MORE GREEN
